Index to Volume XVIII, Series II.

A.

Absorption Coefficients, An X-Ray Spectrometer for the Determination of, *Elmer Dershem*, 324.

Absorption of Radiation, The Distinction between Intrinsic and Spurious Contact E.M.F.s and the Question of the, by Metals in Quanta, *R. A. Millikan*, 236, 479.

Absorption Spectra, Recent Observations of, *Arthur S. King*, 335.

Absorption Spectra, The Infra-red, of Alkali Hydroxides, *G. E. Grantham*, 339.

Absorption of Water, The Coefficient of, *G. E. Grantham*, 339.

Absorption of X-Rays, The Laws of, *F. K. Richtmyer*, 13.

Acoustical, An, Galvanometer for the Measurement of Small Alternating Currents, *F. R. Watson* and *L. B. Ham*, 178.

Acoustic Output, On the Measurement of the and Efficiency of Fog-Alarm Apparatus, *Louis V. King*, 120.

Addenda and Errata, 477.

Aircraft Radio, Some Physical Problems of, *L. E. Whittemore*, 149.

Alkali Hydroxides, The Infra-red Absorption Spectra of, G. *E. Grantham*, 339.

Alkali Vapors, On the Photoelectric Effect of, *Jakob Kunz*, 130.

Alternating Currents, An Acoustical Galvanometer for the Measurement of Small, *F. R. Watson* and *L. B. Ham*, 178.

Amalgams, Contractions and Expansions of with Time, *Arthur W. Gray*, 108.

American Physical Society: Abstracts, 88, 314. Minutes, 85, 313.

Amplifier, The Detecting Efficiency of the Resistance Capacity Coupled Electron Tube, *E. O. Hulburt*, 314.

Amplifier, The Detecting Efficiency of the Resistance Capacity Coupled Electron Tube, *E. O. Hulburt*, 165.

Andrews, Mary R., X-Ray Analysis of Three Series of Alloys, 245.

Atomic Radii, *Maurice L. Huggins*, 333.

Atmospheric-Electric Potential-Gradient, Note on the Diurnal Vatiation of the, *S. J. Mauchly*, 161.

Atoms, Some Facts Bearing on the Structure of, Particularly of the Helium Atom, *R. A. Millikan*, 456.

B.

Ballistic Galvanometer, On the Determination of Instantaneous Pressures in Guns by Means of a Piezo-Electric Gage and a, *J. C. Karcher*, 107.

Band Spectra, The Effect of Pressure on the, of Nitrogen, *Jean Huddleston*, 327.

Barium, Temperature Effect in, and Strontium Photoelectric Cells, *Theodore W. Case*, 413.

Bates, Frederick, The New Fixed Point on the Thermometric Scale, 115.

Becker, A. L., On the Exploded-Wire Spectrum of Calcium, 164.

Benade, J. M., Thermoelectric Effects in Iron and Mercury due to Asymmetric Heating, 199.

β Rays, On Emergent, from Materials of Different Atomic Weight and Different Thickness Produced by γ rays: Studies by the Statistical Method, *Alois F. Kovarik*, 154.

Binaural Location, The, of Pure Tones, *R. V. L. Hartley* and *Thornton C. Fry*, 431.

Birge, Raymond T., The Effect of Temperature on the 3883 CN Band, 319.

Bismuth, Crystalline Structure of, *H. Kahler*, 210.

Bismuth Films, Physical Properties of Thin, L. F. Curtiss, 255.

Bovie, W. T., Photo-electric Potentials from the Retina, 131.

Braun Tube, A, Undamped Wave, Precision Method of Determining Dielectric Constants of Gases, *L. T. Jones* and *H. G. Tasker*, 330.

Breit, G., The Distributed Capacity of Inductance Coils, 133.

The High-Frequency Resistance of Inductance Coils, 135.

Some Effects of the Distributed Capacity of Coils to Ground, 135.

Method of Measuring Coil Capacities and Standardizing Wave-Meters, 136.

Bridgman, P. W., The Effect of Pressure on the Thermal Conductivity of Metals, 115.

Bromine X-ray Absorption Limits, *Oswald B. Overn*, 350.

Brown, F. C., The Effect of Roughening of Surface on the Dispersion of Cannon Ball in Falling through Air, 105.

Brown, Joseph G., The Reaction of Iron with Nitric Acid, 329

Brush, Charles F., Discussion of a Kinetic Theory of Gravitation, II., and Some New Experiments in Gravitation, 125.

Bryan, A. B., Conductivity of Flames Containing Salt Vapors, 275.

C.

Cady, W. G., New Methods for Maintaining Constant Frequency in High-Frequency Circuits, 142.
Calcium, Vapor Pressure of Metallic, *Norman B. Pilling*, 362.
Calcium, On the Exploded-Wire Spectrum of, *R. A. Sawyer* and *A. L. Becker*, 164.
Capacity of Inductance Coils, The Distributed, *G. Breit*, 133.
Capacity of Coils, Some Effects of the Distributed, to Ground, *G. Breit*, 135.
Capillary Flow, Note on the Dynamics of, *Willard Gardner*, 206, 477.
Carbon Bisulphide, The Index of Refraction of Water, Ethyl Alcohol, and, at Various Temperatures, *Arthur R. Payne* and *Elmer E. Hall*, 326.
Case, Theodore W., Temperature Effect in Barium and Strontium Photo-electric Cells, 413.
Castleman, Jr., R. A., Magnetic Rotatory Dispersion in Transparent Liquids, 143.
Chaffee, E. L., Photo-electric Potentials from the Retina, 131.
Detection Coefficient of Thermionic Valves, 152.
Coil Capacities, Method of Measuring, and Standardizing Wave-Meters, *G. Breit*, 136.
Coaxial Cylinders, The Effect of a Uniform Magnetic Field on the Motion of Electrons between, *Albert W. Hull*, 31.
Coaxial Cylinders, Theory of the Motion of Electrons between, taking into Account the Variation of Mass with Velocity, *Leigh Page*, 58.
Coefficient of Mutual Induction, On Some New Formulae for the Direct Numerical Calculation of the, of Coaxial Circles, *Louis V. King*, 139.
Coils, On the Radiation of Energy from, *Arthur Gordon Webster*, 164.
Color Temperature of High Efficiency Lamps, *W. E. Forsythe*, 147.
Compton, Arthur H., Secondary High Frequency Radiation, 96
The Polarization of Secondary X-Rays, 97.
The Width of X-Ray Spectrum Lines, 322.
A Possible Origin of the Defect of the Combination Principle in the X-Rays, 336.
Conductivity of Flames containing Salt Vapors, *A. B. Bryan*, 275.
Constant Frequency Differences, Standard Wave-Lengths and, in the Spectra of Inert Gases, *W. F. Meggers*, 160.
Contact E.M.F.s, The Distinction between Instrinsic and Spurious, and the Question of the Absorption of Radiation by Metals in Quanta, *R. A. Millikan*, 236, 479.
Constant Frequency, New Methods for Maintaining, in High-Frequency Circuits, *W. G. Cady*, 142.
Coster, D., On the Emission and Absorption Wave-Lengths of the Characteristic Radiation in the L-Series, 218.
Covariance, The Principles of Projective, *Israel Maizlish*, 1.
Cn Band, The Effect of Temperature on the, *Raymond T. Birge*, 319.
Cox, R. T., The Design of a Standard Wavemeter, 149.
Curtis, Harvey L., The Resistance and Inductance of a Three-Phase Cable, 156.
Curtiss, L. F., Physical Properties of Thin Metallic Films, 255.
Crystals, The Reflection of X-Rays by, *H. A. Wilson*, 396.
Crystal Analysis, A Photographic Method of X-Ray, *Elmer Dershem*, 324.
Crystalline Structures, The, of Sputtered and Evaporated Metallic Films, *H. Kahler*, 210.
Crystal Structure of Alloys, *Mary R. Andrews*, 24

D.

Damping, The Effect of, on the width of X-Ray Spectrum Lines, *G. E. M. Jauncey*, 322.
Davey, Wheeler P., The Absolute Sizes of Certain Monovalent Ions, 102.
Dellinger, J. H., Present Status of the Electric and Magnetic Units, 121.
Radio Signal Fading Phenomena, 148.
The Radio Research Field, 152.
Dempster, A. J., Positive Ray Analysis of Lithium and Magnesium, 415.
Dershem, Elmer, An X-Ray Spectrometer for the Determination of Absorption Coefficients, 324
Secret Photo-Electric Signalling, 324.
A Photographic Method of X-Ray Crystal Analysis, 324.
Deformation, A New General Law of, *P. G. Nutting*, 107.
Detection Coefficient of Thermionic Valves, *E. L. Chaffee*, 152.
Detecting Efficiency, The, of the Resistance Capacity Coupled Electron Tube Amplifier, *E. O. Hulburt*, 165.
Dielectric Constants of Gases. A Braun Tube, Undamped Wave, Precision Method of Determining, *L. T. Jones* and *H. G. Tasker*, 330.
Dispersion of Cannon Ball, The Effect of Roughening of Surface on the, in Falling through Air, *F. C. Brown*, 105.
Diurnal Variation, Note on the, of the Atmospheric-Electric Potential-Gradient, *S. J. Mauchly*, 161.
Dorsey, Herbert Grove, Peculiar Ice Formations, 162.
Duane, William, A Remeasurement of the Radiation Constant, h, by Means of X-Rays, 98.

Duration of Impact of Bars, *Irwin W. Tschudi*, 423.
Dynamics of Capillary Flow, Note on the, *Willard Gardner*, 206, 477.
Earth Currents and the Sun's Induction, *Fernando Sanford*, 316.
Earth's Magnetic Field, Note on the, *W. F. G. Swann*, 140.
Eckhardt, E. A., A Recorder of Radio Time Signals, 150.
Edwards, Preston, A Simple Apparatus for Testing Pitch Control, 120.
Efficiency Lamps, Color Temperature of High, *W. E. Forsythe*, 147.
Electric Charge, The Moon's, *Fernando Sanford*, 314.
Electric Doublet Theory, An, of the Nature of the Molecular Forces of Chemical and Physical Interaction, *R. D. Kleeman*, 303.
Electrical Resistance, The, of the Human Body, *F. Wenner, Jas. S. Martin, Nyna Forman*, 141.
Electric Units, Present Status of Magnetic and, *J. H. Dellinger*, 121.
Electrically Heated Filament, The Temperature of an, *Chester Snow*, 158.
Electrodynamic Equations, A Generalization of the, with Applications to the Structure of the Electron and to Radiationless Orbits, *Leigh Page*, 155.
Electrodynamics, Generalization of, with Applications to the Structure of the Electron and to non-radiating Orbits, 292.
Electron, Generalization of Electrodynamics with Applications to the Structure of the, and to non-radiating Orbits, *Leigh Page*, 292.
Electrons, The Effect of a Uniform Magnetic Field on the motion of, between Coaxial Cylinders, *Albert W. Hull*, 31.
Electrons, Theory of the Motion of, between Coaxial Cylinders taking into Account the Variation of Mass with Velocity, *Leigh Page*, 58.
Electrostatic Charge, The Variation of Metallic Conductivity with, *Henry A. Perkins*, 131.
Electron Tube Amplifier. The Detecting Efficiency of the Resistance-Capacity Coupled, *E. O. Hulburt*, 148.
Electron Tube Amplifier, The Detecting Efficiency of the Resistance Capacity Coupled, *E. O. Hulburt*, 165.
Emissive Powers, Total, and Resistivities of Tungsten at Incandescence, *A. G. Worthing* and *W. E. Forsythe*, 144.
Erikson, Henry A., The Change of Mobility of the Positive Ion in Air with Age, 100.
Ethyl Alcohol, The Index of Refraction of Water, and Carbon Bisulphide at Various Temperatures, *Arthur R. Payne* and *Elmer E. Hall*, 326.

F.

Fairchild, C. O., A Disappearing Filament Optical Pyrometer Free from Diffraction Effects at the Filament, 116
Fixed Point, The New, on the Thermometric Scale, *Frederick Bates* and *F. P. Phelps*, 115.
Fog-Alarm Apparatus, On the Measurement of the Acoustic Output and Efficiency of, *Louis V. King*, 120.
Foote, Paul D., Characteristic Low Voltage X-Radiation from Arcs in Metallic Vapors, 94.
The Excitation of Enhanced Spectra in Low Voltage Arcs, 128.
Forsythe, W. E., Total Emissive Powers and Resistivities of Tungsten at Incandescence, 144.
Color Temperature of High Efficiency Lamps, 147.
Forman, Nyna, The Electrical Resistance of the Human Body, 141.
Fry, Thornton C., The Binaural Location of Pure Tones, 431.

G.

Galvanometer, An Acoustical, for the Measurement of Small Alternating Currents, *F. R. Watson* and *L. B. Ham*, 178.
γ Rays, On Emergent β Rays from Materials of Different Atomic Weight and Different Thickness Produced by, Studies by the Statistical Method, *Alois F. Kovarik*, 154.
Gardner, Willard, Note on the Dynamics of Capillary Flow, 206, 477.
Gaussian Parameter Method of Studying Wave Transmission, *Irwin Roman*, 62.
Ghosh, R. N., Note on Radiation Pressure, 380.
